

WordPress Theme Resources

WordPress Themes:

These are the resources that I use or ones that come highly recommended to me. Each organization that designs their own themes can also have a framework that they work under, and I will do a blog on frameworks later on. So if you are going to use a Rockettheme template, for example, you would do better using their framework as well which comes in the form of a separate plugin called Gantry, but this can be a good thing. Woothemes has its own framework as well, so shop around if you are “Geeky” enough to want to spend the time.

Most of these sites have both free and paid themes. For a really good theme for your site, you can find free ones that will fit your needs, but beware, they are what they are. They may not be updated often enough, and could break down after a few updates to the WordPress main core.

WordPress.org: *Some great free themes here. Some will already come bundled with your installation of WordPress. There is a better chance that these themes will be supported although a lot of these are also designed by third party designers. The difference is that they have to be approved by WordPress before they are available for download.*

RocketTheme: *“Has an extensive collection of premium WordPress themes available for purchase and download. Each of our themes are built with usability and customization as a priority. Each theme can be easily modified to fit virtually any blog, portfolio, or corporate site. They add a new theme every month, and an array of propitiatory extensions to enhance your site”. These are the themes I use at the moment, not because I think they are better, but because I am in a Rockettheme mode at the moment.*

Elegant Themes: *“Design is our art and our passion. Our goal is to create the best WordPress Themes with a pixel-perfect eye for detail and a high standard for aesthetic excellence. Let us help you make your website simple, beautiful and professional.” I have used their themes in the past, and found them to be really good.*

Headway Themes: *“Headway Themes allow you to build any layout you can think of, with full customization of any page with the powerful Headway Visual Editor.” I have one test site using this type of theme. Like all intricate themes, there is a learning curve that will have to be overcome, but worth it in the end.*

WooThemes: *are powered by the versatile WooFramework allowing you to build a site with incredible flexibility. They also have some very powerful plugins, including their eCommerce one, that work better with their themes.*

Other WordPress Theme Resources to try:

Theme Trust - <http://themetrust.com/>

Moderately price themes ranging from basic to magazine templates. Very nice and responsive, but it is a pay for template site. This isn't a bad thing, as I said in my earlier articles, the support is generally better and updates are generally better when you purchase a theme rather than go for a free one.

[Studio Press - http://www.studiopress.com/](http://www.studiopress.com/)

The Genesis framework in particular use the child theme that it has to get close to the build the client is looking for. It ill help you get close to the build they want and helps those on a limited budget. Genesis is a great framework to be working with, and if you are going to start learning a framework, I would recommend this one.

[PageLines - http://www.pagelines.com/shop/](http://www.pagelines.com/shop/)

PageLines customers are a diverse and talented group of professionals from around the world. PageLines software is now used in over 170+ countries and powers sites as varied as Bicycle Tours in London to Musicians in Sweden. Within such a global community there are many unique ways of designing websites. With this in mind we wanted to create a place where you can share your creativity and learn from the creativity of others.

[Template Hawk - www.templatehawk.com](http://www.templatehawk.com)

This is yet another resource for templates. They really have nothing to say about themselves over there but they do have some decent templates and offer 'affordable' customization.

[Themezilla - www.themezilla.com/](http://www.themezilla.com/)

We build premium WordPress themes & plugins. Over 40,000 customers use our themes to power their websites. Become a member today and download our entire collection.

[Creative Market - www.creativemarket.com](http://www.creativemarket.com)

Yet another company that doesn't say a lot for itself, but I would recommend going over there an taking a look. There themes are really beautiful, and very pastel like. They also have plug-ins and custom vector graphics. Their blog is also not all about them but have a great number if useful "How to" articles. So check it out.

[Theme Foundry - thethemefoundry.com](http://thethemefoundry.com)

A brand you can trust. Established in 2008, we've been selling WordPress themes for over 7 years. We're an official WordPress.com partner. Our themes meet their strict quality and security guidelines. Our newest themes include professional grade Typekit® fonts. You won't find this anywhere else.

[ZigZag Press - http://zigzagpress.com/](http://zigzagpress.com/)

Find a range of flexible, functional Premium WordPress Themes built on the rock-solid Genesis framework! Yet another website that offers themes running on the Genesis framework. You can beat that.

[JV Zoo - http://www.jvzoo.com](http://www.jvzoo.com)

In case you wanted to create a store just selling templates, plugins and the like, I included this website. In their own words: "There are no out of pocket costs to become a JVZoo seller. You can create as many buy buttons as you like and add as many products as you want to our marketplace. You will never be charged a fee for doing so."

[Wanna Find a Plug-in?](#)

I re-worked this wonderful compilation of plugins I have come across. Some of them will be old, so let me know, and I will try to keep an updated list. My favourites are among these, but I have probably test-driven all of them at some point. I have also left out some of the more obvious ones, and it's fine to bring my

attention to those as well.

So if you have a plug-in you would like to see on the list feel free to post it in the comments section below along with anything else you might have to say. This list will be changing from week to week and I will be adding new information as I get ideas of what to include, and I will be tweeting the changes so make sure [you are following me on twitter](#).

I am also not rating which I think are best at the moment, but it is on the cards when I review this list for plugin additions, so if you see an asterisk, or other form of rating mechanism, then that means I have started doing just that. So check your twitter feed under [@barbapplestudio](#)

A really nice resource for searching for plugins based on category, downloads, votes, etc is:

<http://wpplugindirectory.org/>

“Google Trends for .org Plugins” - Simple tool to compare free WordPress.org plugins side-by-side:
